Civil Engineering

Dear John,

Davel Engineering & Environmental is pleased to announce the addition of Travis Stuck to our team. Travis' expertise in the area of Wetland Determinations/Delineations and Soil & Site Assessments will be a great asset to our staff and one more person to better serve your needs.

If you have a suggestion on subjects you'd like to know more about, contact us, and we'd be glad to cover it here.

John R. Davel, P.E.
President

New Employee

Travis Stuck, former proprietor of Eastern Ridges Land Consulting Services, LLC recently joined our team and heads the Environmental services for Davel. Travis specializes in, and has 10+ years experience conducting Wetland Determinations/Delineations and Soil & Site Assessments. He strives for accurate and precise determinations and conducts his work in a professional manner, with an emphasis in customer service.

His professional experience includes private and public sector work: owning & operating Eastern Ridges Land Consulting, working for a local surveying firm, and most recently, as a Soil Conservationist with the United States Department of Agriculture (USDA)-Natural Resource Conservation Service (NRCS). With the NRCS Travis worked closely with landowners, local agencies, zoning, and conservation departments.

Travis holds a Bachelor of Science degree in Resource Management, with an emphasis in soil and water resources. He has additional education in surveying and land law as well. He currently is a Certified Soil Tester (CST)-Department of Safety & Professional Services and is in the process of attaining Professional Wetland Scientist's Certification through the Society of Wetland Scientists Professional Certification Program.

Wetland Identification Program

The State of Wisconsin Department of Natural Resources has announced a new service they offer for 15 counties in Wisconsin. They hope to expand this program to include all counties next year.

For a fee, the WDNR will come out to your property and perform a wetland determination or will verify a delineation performed by a consultant. Their determination will only answer whether or not wetlands exist on the property. This service will **not** determine a boundary of the wetland. Of course, we can perform a determination(s) as well as delineate the boundaries. Normally the WDNR will only review a consultants delineation, if there is also a permit pending. Now, for a fee, they will review the delineation without a permit pending, which will be valuable for project planning.

Shoreland Zoning Update

The State of Wisconsin Department of Natural Resources has scheduled public hearings on the revisions to NR 115, Shoreland Zoning. One of these public hearings is scheduled for August 7th in Greenville.

The proposed revisions include restrictions on impervious area in the shoreland zone, non conforming structure standards, and vegetative management standards. For more information please contact our office.

I hope this important news update is relevant to your business. If you'd like to learn more information about our firm or services, please give me a call at 920-560-6563, or visit our website at www.davel.pro.

Sincerely,

John Davel
